

Hamilton Taveras Vélez

CHIEF DATA GOVERNANCE OFFICER & RISK ANALYTICS

El Millón Biblioteca Nacional #46, Distrito Nacional, República Dominicana | Nationality: American-Dominican

☎ +1-829-986-7789 | ✉ htv399@gmail.com | 🏠 caribbeanquant.substack.com | 🌐 hamilton-taveras

Profile

Economist with more than 10 years of experience in **economics, finance, and consulting**, focused on strategic decision-making. Specialized in **econometric and machine learning models** for forecasting, process optimization, risk analysis and valuation, with a track record in leading projects such as the **implementation of a data governance framework, digital transformation, and the tax risk management model**.

Professional Experience

Chief Data Governance Officer – Dirección General de Impuestos Internos (DGII)

July 2024 – Present

- Lead the *Institutional Data Strategy 2025–2028*, aimed at strengthening data governance and the use of AI in decision-making.
- Define standards for data management, interoperability, and quality across key processes (registries, tax returns, real estate, vehicles, current accounts, payments, and others), to enhance tax, financial and macro-economic risk analysis and management.

Head of Risk Analysis and Prioritization – DGII

July 2019 – July 2024

- Implement the *Tax Risk Prioritization and Consolidation System*, optimizing audit allocation through risk, valuation and financial modelling.
- Develop machine learning models to detect *non-compliance and anomalies*, and build the Global Taxpayer Risk Profile.

Economic and Tax Studies Specialist – DGII

October 2014 – June 2019

- Conduct economic and tax research to evaluate the impact of fiscal reforms and policy measures.
- Analyze fiscal implications of tax incentive laws in sectors such as *mortgage markets, solid waste, trusts, and the film industry*.

Consulting Experience

World Bank – Climate-Resilient Housing Strategy

August 2024 – June 2025

- Conduct a comprehensive diagnostic of the housing sector in Greater Santo Domingo, analyzing demand, supply, financing, and the institutional framework.
- Assess macroeconomic and climate resilience implications to inform public policy.

Ministry of Industry, Commerce and MSMEs (Dominican Republic) – Macroeconomic Forecasting System

May 2024 – December 2024

- Design a hybrid methodology combining *machine learning and econometrics* to forecast sectoral GDP, employment, inflation, and other variables.
- Implement an automated forecasting system with volatility and causality analysis: data ingestion and pre-processing in R, modeling in Python, and visualization in Power BI.

Dirección General de Ingresos (Panama–CIAT) – Tax Revenue Forecasting

March 2022 – April 2022

- Develop an automated econometric module of *base-tax elasticities* to estimate tax revenues by tax category.

Teaching Experience

Pontificia Universidad Católica Madre y Maestra (PUCMM)

January 2018 – Present

- Graduate-level courses in Treasury and Banking Management: *Financial Engineering, International Financial Markets, and Corporate Valuation*.
- Undergraduate courses in Economics: *Econometrics, Microeconometrics, and International Macroeconomics*.

Education

- **Financial Valuation Modelling Analyst (FMVA)**, Corporate Finance Institute (CFI), 2025–Present
- **Financial Engineering Specialization**, Columbia University, 2024–Present
- **Deep Learning Specialization**, DeepLearning.AI, 2023
- **Machine Learning Specialization**, Stanford University & DeepLearning.AI, 2022
- **M.A. in Economics**, Georgetown University, Magna Cum Laude, 2017
- **M.A. in Economics**, ILADES, Chile, Magna Cum Laude, 2017
- **Postgraduate in Quantitative Methods**, PUCMM, Cum Laude, 2015
- **B.A. in Economics**, UASD, Magna Cum Laude, 2013
- **Other trainings**

Publications and Research

- **News Shocks and Tax Reform in the Dominican Republic: a Bayesian DSGE Approach**
Georgetown University & Universidad Alberto Hurtado (2017).
- **Macroeconomic Determinants of Tax Revenues in the Dominican Republic: a SVAR Approach**
DGII – Economic and Tax Studies (2016).
- **Cost-Benefit Analysis of the Tax Incentive Regime for Free Zones in the Dominican Republic**
Ministry of Finance Award, First Place (2019).
- **Opportunities and Entrepreneurship: Evidence on Advanced Labor Market Experience**
Graduate Student Research Center, University of California, Berkeley.
- **Determinants of Intimate Partner Violence Against Women in Dominican Households**
Machine Learning approach. Ministry of Economy, Planning and Development – FIES Award (2020).
